1	Indices and tables	3
1.1	Quickstart	3
1.2	API Reference	3
	Python Module Index	5

Contents:

INDICES AND TABLES

- *genindex*
- *modindex*
- *search*

1.1 Quickstart

towbar is a python library for the [boxcar.io](#) web service. It can be imported into any python module:

```
from towbar import Towbar
tow_bar = Towbar(user, password)
```

The object then provides the following API methods:

```
tow_bar.notify_myself(message, sender)
```

There is also an exported API function which can be used directly:

```
import towbar
towbar.send_notification(user, password, text)
```

1.2 API Reference

If you are looking for information on a specific function, class or method, you can most likely find it here.

1.2.1 API

This chapter covers all API interfaces of the towbar module.

Towbar main class

```
class towbar.Towbar(username, password)
```

Class for interacting with the boxcar web service

```
    notify_myself(message='', sender='towbar', source_url=None, icon_url=None, sound=None,
                  callback=None)
```

method to send a notification to yourself

Arguments:

- sender (string): sender of the message
- message (string): message to send
- sender: sender of this message
- source_url: the source URL for the notification
- icon_url: URL for the icon to use
- sound: name of the sound to use
- callback: JSONP callback

Returns:

- response (requests response): response from the requests call
